CREME HAIR BLEACH

FOR FACE

A Complete, Easy-To-Use Hair Bleaching Kit
To Lighten Dark, Unwanted Hair.

INCLUDES:

- CREME BLEACH
- BAKING SODA ACTIVATOR
- MIXING TRAY
- SPATULA APPLICATOR

CREME HAIR BLEACH FOR FACE gently and effectively lightens dark facial hair so it blends into your skin tone with natural-looking results. Just one application softens and fades dark hair so it becomes unnoticeable. Easy to use, even if you've never bleached before.

IMPORTANT!

Read directions carefully before using this preparation. Do not use creme bleach around eyes. KEEP OUT OF REACH OF CHILDREN.

Patch Test, First

Perform a preliminary patch test. Prepare mixture as directed. Apply to a one-inch square area on the inner fold of the elbow. Leave on ten minutes. Rinse off with cool water. Wait 24 hours. If no redness, irritation or eruption occurs, proceed with application.

Directions:

1. Wash face gently with soap and water. Pat dry.
2. Use the Spatula to scoop one heaping spatula full of Activator (about 1/4 teaspoon) into mixing tray.
3. After washing and drying Spatula, measure two heaping spatulas full of Creme Bleach (about 1/2 teaspoon) into Mixing Tray.
4. Blend Activator and Creme Bleach thoroughly in the Mixing Tray.
5. With Spatula, apply thoroughly blended mixture onto area to be bleached. Be sure to cover all hair.
6. Leave mixture on face for 8 minutes; remove with Spatula. If hair needs more lightening, reapply and wait another 5 minutes.
7. When bleaching is complete, wash mixture off your face with cool water.
8. Wash and dry Spatula and Mixing Tray.

IMPORTANT!

Sally Hansen® Creme Hair Bleach For Face is harmless to most skin and may be used as often as necessary. If your skin is sensitive to the blended mixture, remove mixture with Spatula and wash face with cool water and dry. Wait 24 hours before reapplying. Create a new batch of mixture with these proportions: one teaspoon Creme Bleach and 1/4 teaspoon Activator. Apply as per directions. Should your skin still feel sensitive, remove mixture and wash face with cool water. Do not apply again.

The first time you use Creme Hair Bleach on stubborn facial hair, it may be necessary to repeat the application to achieve the desired degree of lightening. With continued daily application, the desired fading of color and softening of hair will be noticed. Thereafter, a weekly application or once every two weeks will keep superfluous hair invisible.

CAUTION:

Do not apply preparation after a hot bath, over skin freshener or under other conditions that would open pores of the skin. Do not use around eye area. If bleach mixture gets into eyes, rinse immediately and thoroughly with cold water or boric acid solution.

Keep jar and bottle tightly closed. Keep Spatula and Mixing Tray clean. Mix Creme and Activator only in Mixing Tray. Discard any unused mixture after treatment. Store kit in a cool, dry place.

KEEP OUT OF REACH OF CHILDREN.
