EXTRA STRENGTH CREME HAIR BLEACH

FOR ARMS, LEGS, & FACE

A Complete, Easy-To-Use Hair Bleaching Kit
To Lighten Even The Darkest Unwanted Hair.

INCLUDES:

- PRE-CONDITIONER
- CREME BLEACH
- ACTIVATOR
- MIXING CUP
- SPATULA APPLICATOR

EXTRA STRENGTH CREME HAIR BLEACH For Arms, Legs, & Face quickly and effectively lightens dark facial hair so it blends into your skin tone with natural-looking results. Helps fade even the darkest, most stubborn hair so it becomes unnoticeable. The exclusive Pre-Conditioner helps prepare and protect skin during bleaching.

IMPORTANT!

Read directions carefully before using this preparation. Do not use creme bleach around eyes. KEEP OUT OF REACH OF CHILDREN.

Patch Test, First

A preliminary patch test is necessary. Smooth Pre-Conditioner onto a one-inch square area on the inner fold of your elbow. Prepare mixture as directed. Apply over the Pre-Conditioner. Leave on ten minutes. Rinse off with cool water. Wait 24 hours. If no redness, irritation or eruption occurs, proceed with application.

Preparation

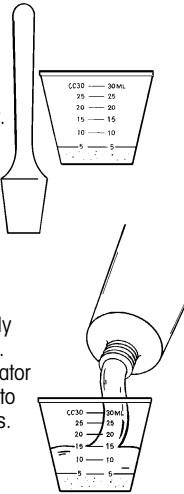

Gently wash area to be bleached with soap and cold water. Dry thoroughly. Saturate a cotton ball with Pre-Conditioner and smooth it over entire area to be bleached. Allow to dry thoroughly. While waiting for Pre-Conditioner to dry, proceed with mixing as follows:

Mixing

1. USING THE ML SCALE on the Mixing Cup, pour powder Activator up to the 5 ML line, as shown at right.

2. Squeeze Extra Strength Creme Hair Bleach into Mixing Cup, filling to 15 ML line, as shown. Use the Spatula to level the Creme. (Now you have the right proportion of two parts bleach to one part activator!) Cap tube tightly.

3. Use the enclosed Spatula to thoroughly blend the Activator and Creme Bleach. For bleaching larger areas, pour Activator to 10 ML line and add Creme Bleach to 30 ML line, following above directions. You are now ready to bleach.

Application

1. Spread bleach mixture with Spatula, completely covering hair you want lightened.
2. Wait 8 minutes. Use Spatula to remove mixture from one small area. If hair is not completely bleached, apply more mixture over area and wait 5 more minutes.
3. Wash off with cold water. Dry thoroughly.
4. Discard any remaining mixture. Wash and dry Spatula and Mixing Cup.

Resistant hair may require subsequent treatments to reach the desired degree of lightness. Wait 24 hours before repeating application.

IMPORTANT!

If tenderness or irritation occur during treatment, remove mixture with Spatula. Return it to Mixing Cup; add more Creme Hair Bleach, blend thoroughly and reapply. If skin is still sensitive, remove completely with cold water. Wait 24 hours before trying again.

Do not use immediately after a hot bath or shower or in a steam-filled room. Open pores may create sensitivity.

Do not use near eyes or in vaginal area. If bleach mixture gets into eyes, rinse immediately and thoroughly with cold water or boric acid solution.

Do not apply to cut, irritated, inflamed or sunburned skin. Wait until skin is healed.

Never mix Cream Bleach and Activator until you're ready to begin treatment. Always discard any unused mixture after treatment. Rinse Cup and Spatula after each use. Never use metal dishes or applicators. Store kit in a cool place. Be sure tube and bottles are tightly capped.

KEEP OUT OF REACH OF CHILDREN.
