Featuring Easy-To-Use PRESS ON/PULL OFF WAX STRIPS in two special sizes

PLUS:

Azulene Finishing Oil to cleanse, remoisturize and soften skin after hair removal treatment.

PLEASE READ THIS INSTRUCTION BOOKLET CAREFULLY BEFORE PROCEEDING WITH TREATMENT.

Beautiful, Long-Lasting Benefits

Remove dark, coarse, unwanted hair...with results that last longer than you ever dreamed possible!

Sally Hansen® HAIR REMOVER WAX STRIP KIT For Legs, Body & Bikini Area effectively removes hair with the root from the hair follicle, not just at skin's surface, so it slows the appearance of regrowth for weeks and weeks.

Strong, durable Hair Remover Wax Strips are coated with a European Salon Formula Wax containing Bisabolol, a soothing agent. Azulene Finishing Oil cleanses skin of wax residue and helps restore moisture after hair removal.

Although regrowth time varies from person to person, hair generally reappears in about 8 weeks. With proper, regular use, and after several treatments, regrowth will appear much sparser, softer and finer-textured. And there's never any coarse, unsightly stubble!

Where To Use

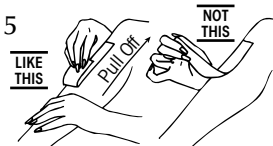

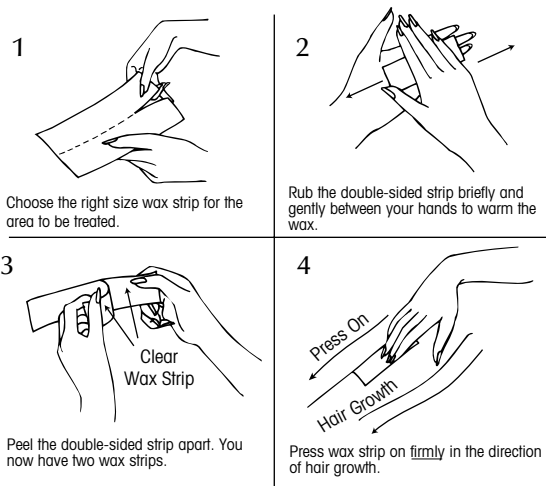

Hair Remover Wax Strip Kit For Legs, Body & Bikini Area is specially designed to remove hair from legs, arms, underarms, bikini area or wherever unwanted hair is a problem. For removing hair from small areas such as chin, eyebrows and upper lip, use the specially designed wax strips in Sally Hansen® HAIR REMOVER WAX STRIP KIT FOR FACE, EYEBROWS & BIKINI AREA.

For Best Results:

Hair to be removed should be at least 1/4" long (about 21 days growth) for maximum product effectiveness, and skin must be dry and free of oil.

Directions:

1. Wash area where hair is to be removed with soap and water. Thoroughly pat dry.
2. Warm wax by rubbing strips briefly and gently between your hands.
3. Determine direction of hair growth before applying wax strip.
4. PRESS ON wax strip firmly in the direction of hair growth.
5. Hold skin taut with one hand. With the other hand, PULL OFF wax strip in opposite direction of hair growth. Keep your hand as close to the skin as possible. If the strip is peeled too slowly, wax will remain on skin and hair will not come off.
6. Repeat Steps 1–5 until the area is free of hair.
7. Dispose of used strips after removing all unwanted hair. Use fresh, new strips the next time you need to remove unwanted hair. NOTE: To avoid irritation, do not apply more than once to the same spot in a 24-hour period.
8. After hair removal, apply a small amount of Azulene Finishing Oil to treated area with a cotton ball or tissue to wipe away any wax residue and to help remoisturize skin.

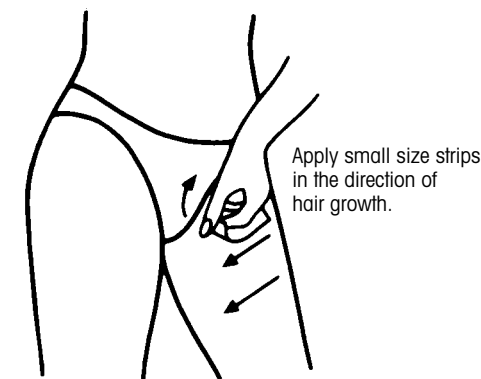

Preparation & Application

No mixing! Choose the strip size just right for your needs. Strips must be warmed by rubbing each double-sided strip between your hands. Peel the double-sided strip apart, press on and pull off – it's that simple! As each wax strip is pulled away, the hair embedded in the wax goes too! Any wax residue can be easily removed with the Azulene Finishing Oil.

Always be sure to check the direction of hair growth. Strips must be pulled off in the opposite direction of hair growth. Also, remember to stretch the skin taut with one hand while removing the strip with the other. When removing longer hair, trim hair first to 1/4" length before applying strip.

Bikini Area

The same procedure can be followed for the bikini line, tummy and nape of neck. Always be sure to check direction of hair growth first. It is best to divide the area and work on small sections. Also, remember to stretch the skin taut with one hand while quickly removing the strip with the other. When removing longer hair – at nape of the neck, for instance – trim hair first to a 1/4" length before applying strip.

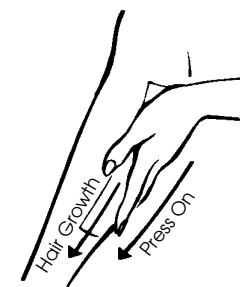

Legs & Arms

For best results: the hair should be at least 1/4" long. Allow hair to grow in for 3 weeks after shaving or use of a cream hair remover.

For hair removal on large leg areas, use the large size strips.

For arms, use the small size strips and apply in direction hair grows, usually across width of the arm. Pull off in opposite direction.

CAUTION:

- DO NOT use on irritated, chapped, sunburned or cut skin, or over moles or warts. NEVER use on hairs inside nostrils, ears or on eyelids. Do not use on lips.
 - If used in the underarm area, do not use deodorants for 24 hours.
 - A slight reddening of the skin is normal for several hours after removal of hair by root, as is a minor stinging sensation on sensitive skin. In case of more extreme skin reaction, discontinue use immediately.
 - Always check hair's growth pattern before applying strip. Failure to remove hair usually indicates that you've pressed on in the wrong direction or pulled the strip off too slowly.
 - Apply only once over the same area in a 24-hour period to help minimize irritation.
- AND ALWAYS REMEMBER...
- For best results, wait at least 21 days before using on areas you've shaved or treated with cream removers.
 - Apply only once over the same area in a 24-hour period.
