

## EXTRA STRENGTH BRAZILIAN BIKINI WAXING & SHAPING KIT

EXCLUSIVE BRAZILIAN FORMULA

Perfect for Bikini Area

### GET THE HOT NEW BRAZILIAN BIKINI WAX LOOK AT HOME!

Sally Hansen EXTRA STRENGTH BRAZILIAN BIKINI WAXING & SHAPING KIT gives you everything you need to create a perfect bikini line at home... quickly, easily and with no embarrassing salon appointments!

### THE BRAZILIAN ADVANTAGE

A smooth bikini line looks and feels incredibly sexy and sensuous. And today's most revealing fashion looks – the tiniest bikinis, the skimpiest thongs, the silkiest lingerie – demand a smooth, flawless bikini line.

Whether you choose to go totally bare, leave a slender strip of hair or simply remove stray hair for a neater appearance, BRAZILIAN BIKINI WAXING & SHAPING KIT has everything you need to get the look you want!

### WHERE TO USE

EXTRA STRENGTH BRAZILIAN BIKINI WAX is perfect for removing unwanted hair from bikini area, inner and upper thighs and lower abdomen.

### GET BEAUTIFULLY BARE

- EXTRA STRENGTH BRAZILIAN BIKINI WAXING & SHAPING KIT removes even the most coarse, hard-to-remove hair with the root – smooth results last up to 8 beautiful weeks!
- Grips hair, not skin – whisks away hair without pulling delicate skin for maximum smoothness and minimal discomfort.
- Natural botanicals condition and soften thick, coarse hair for better grip, more complete removal.
- Orchid & marine extracts help nourish and moisturize skin.
- Skin looks beautifully bare, feels soft and smooth.
- Vanilla fragrance creates a more pleasant hair removal experience.
- Continued use will help reduce the appearance of hair regrowth.

PLEASE READ THIS INSTRUCTION BOOKLET CAREFULLY BEFORE PROCEEDING WITH TREATMENT

### QUICK TIPS FOR SUCCESSFUL HAIR REMOVAL

- Read all cautions and instructions carefully.
- Clean and dry skin.
- Apply wax in the same direction as hair growth.
- Apply wax in a thin layer. Leave wax thicker on the end for easier removal.
- Remove wax in the opposite direction of hair growth while holding skin taut and keeping the hand that removes the wax as close to skin's surface as possible.
- For the best possible results, please read on.

### PREPARATION

#### HAIR LENGTH

Hair should be at least 1/4" long so it will adhere to wax. Hair should be no longer than 1/2". To avoid tangling and discomfort, use the included scissors to trim longer hair before treatment.

#### PREP SKIN

FOR BEST RESULTS, READ ALL INSTRUCTIONS AND CAUTIONS BEFORE YOU BEGIN. Be sure you keep wax away from areas not being treated. Skin should be clean and dry, free of oils, lotions, cremes and perspiration. Wash areas to be treated with soap and water. Dry thoroughly. If desired, lightly dust skin with talcum powder to help wax adhere better.

#### MIRROR

The included hands-free, self-standing mirror will help you achieve the best possible hair removal results. Simply position the mirror for better visibility as you apply and remove wax. Hair removal will be easier and more complete, even at awkward angles!

### IMPORTANT WAXING STEPS

#### 1) MICROWAVE WAX

- Remove lid from jar. Make sure jar is free of any metal or paper tags.
- Microwave jar of wax for 30 seconds at a medium setting until wax is melted to a spreadable consistency.
- Use the customized handle on the jar to remove from microwave.

NOTE: The suggested heating time range is a guide. Individual microwaves may vary. Heat wax for minimum time first. Repeat at shorter intervals as needed until wax is warm and a thick consistency like honey or caramel.

If it's too cool, it will be difficult to spread. Be sure to heat it sufficiently. TEST WAX TEMPERATURE BEFORE USE. Testing the wax temperature helps prevent overheating and helps ensure wax temperature is safe for use. If wax is too hot, let it cool for a few minutes and test again.

- Carefully break the surface of the wax and gently stir with spatula. Wipe excess wax on jar edge. If wax has not melted, additional heating time is required. Repeat at 15-second intervals until wax is warm and easily spreadable.

DO NOT OVERHEAT. DO NOT EXCEED ONE MINUTE.

If jar is uncomfortable to touch, let cool in microwave before removing. Wipe jar clean and replace cap after use.

#### 2) APPLY WAX

- Check wax temperature before applying. Test wax on the inside of your wrist – wax should be warm, not hot.
- Determine direction of hair growth – apply wax in the same direction. (Hair often grows in several directions in the same area. If needed, work on one small area at a time for accuracy.) Use a spatula to spread a layer of wax over one small area at a time. Leave wax thicker at the end for a better grip and easier hair removal.
- Work in small areas from the outer bikini line to the inner bikini line. Complete one side before going to other side. Do not wax more than a two-inch area at a time.

Removal Direction

#### 3) REMOVE WAX

- IMPORTANT: Be sure to remove wax while it is still slightly soft and pliable. Always hold skin taut when removing wax.
- Gently lift up edge of wax to get a firm grip.
- Hold skin taut with one hand and use the other

hand to remove wax. Keeping hand as close to skin's surface as possible, PULL WAX VERY QUICKLY IN THE OPPOSITE DIRECTION of hair growth. Keep hand as close to skin as possible. If wax is peeled off too slowly, wax will remain on skin and hair will not be removed.

- Immediately apply firm pressure to area with your fingertips or palm of your hand.
- A slight reddening of the skin is normal for several hours after removing hair by the root, as is a minor stinging sensation on sensitive skin. If more severe reaction occurs, discontinue use immediately – do not proceed with full treatment.

### BIKINI SHAPES

TRADITIONAL

EUROPEAN

### AFTER HAIR REMOVAL

- Gently wipe skin with Soothing Azulene Finishing Oil after hair removal is complete to help remove excess wax residue and to moisturize and soften skin.

### DO'S

- DO remember to hold skin very taut when removing wax – particularly on areas of the body where skin is less firm.
- DO keep hand as close to skin as possible when pulling wax off in opposite direction of hair growth.
- DO wait 1 hour after taking a shower or bath before using EXTRA STRENGTH BRAZILIAN BIKINI WAX.

### DON'TS

- DON'T USE EXTRA STRENGTH BRAZILIAN BIKINI WAX if you are currently using Glycolic Acid or other dermatological treatments.
- DON'T USE EXTRA STRENGTH BRAZILIAN BIKINI WAX in a warm room where you may perspire.
- DON'T USE on compromised skin.

### CAUTION

DO NOT ALLOW WAX TO BOIL. DO NOT OVERHEAT. EXCEEDINGLY HOT WAX CAN CAUSE BURNS. HANDLE MELTED WAX WITH CARE. TEST WAX TEMPERATURE ON INSIDE OF WRIST BEFORE BEGINNING APPLICATION. IF WAX IS TOO HOT, ALLOW TO COOL BEFORE PROCEEDING.

- The plastic jar is designed only for use in the microwave. DO NOT USE IN CONVENTIONAL OR TOASTER OVENS. DO NOT APPLY DIRECT HEAT OR FLAME.
- DO NOT leave wax unattended while heating.
- DO NOT use on irritated, chapped, sunburned or cut skin, over moles or warts, or after a hot bath. NEVER use on nipples,

perianal, vaginal/genital areas, or on hairs inside nostrils, ears or on eyelids/eyelashes.

- Avoid irritants such as sunburning or very hot baths for 24 hours after application.
- To avoid irritation, never reapply on the same area within a 24 hour period.
- Ingrown hairs sometimes result from hair removal. To accelerate the shedding of skin cells that may be locking in hairs, rub skin briskly with a loofah sponge or washcloth when showering.
- Always check hair's growth pattern before applying wax. Failure to remove hair usually indicates that you've applied or pulled off in the wrong direction or removed wax too slowly.
- Remove wax while it is still soft and pliable. Overdried wax becomes brittle and is difficult to remove. Wax residue can be removed from the skin by applying azulene oil or baby oil.
- Avoid getting wax on clothing, jewelry, carpeting and personal items.

FOR EXTERNAL USE ONLY. KEEP OUT OF REACH OF CHILDREN.
